Steven H. Mazurek Joins Whitman as Director of Surveying

New Hire Will Expand Whitman's Services to Include Professional Land Surveying for Internal and External Needs

EAST BRUNSWICK, N.J. Whitman, New Jersey's leading environmental, engineering and management firm, has announced that Steven H. Mazurek has joined the firm as director of surveying. In this role, Mazurek will be responsible for providing professional surveying services to new and existing clients, as well as mentoring staff technicians in all aspects of the profession.

Mazurek has more than 30 years of experience as a licensed surveying professional and has worked statewide to perform surveys, including those at Superfund sites, large boundaries for government agencies and public utility companies, telecommunication sites, site surveys for site development, prefabricated steel measurements, municipal surveying and many others.

"We are very pleased to welcome Steve to Whitman. His vast experience made him a natural choice for this position, which will help address some of our growing need for surveying, as well as our clients' increasing demand for this service," said John Colagrande, vice president of engineering for Whitman. "Surveying is a complementary discipline to much of the engineering work we do, including site and civil engineering, foundation and structural engineering and geotechnical engineering."

Mazurek is a member of the New Jersey Society of Professional Land Surveyors, the American Congress of Surveying and Mapping and the National Society of Professional Land Surveyors. He currently serves as the New Jersey Society of Professional Land Surveyors conference chairman, and has previously been named that organization's president and surveyor of the year.

"Whitman is well known and highly respected in the industry, and I am very excited to be a part of this new venture with them," Mazurek said. "I think my skills will fit well with the needs of Whitman's engineering professionals and I look forward to working with them to deliver the highest-quality service to their clients."

Mazurek attended Newark College of Engineering and Union County College. He is a licensed professional land surveyor and professional planner in New Jersey.

About Whitman

Whitman is New Jersey's leading full-service environmental, engineering and management firm, offering expertise in brownfield redevelopment, civil and geotechnical engineering, site assessment, remediation cost recovery, groundwater contamination and recovery, indoor air quality solutions, industrial hygiene and innovative remediation technologies. Since its founding in 1985, the East Brunswick, N.J.-based company has performed more than 2,500 site assessments, remedial investigations and remediation designs for all types of development and redevelopment projects, including commercial, retail and residential properties in more than 12 states. Whitman has secured more than \$30 million in state and federal reimbursements for environmental work for their clients. Whitman is one of the largest full-service firms in the state, providing expertise in all areas of environmental and engineering services.
