## **Whitman's Project Engineer Steve Sadowski Earns Leadership in Energy and Environmental Design (LEED) Professional Accreditation**

### ***Designation Helps Project Engineer Incorporate Green and Sustainable Design into Everyday Practice***

**EAST BRUNSWICK, N.J.** – Whitman, New Jersey's leading environmental, engineering and management firm, has announced that Steve Sadowski, project engineer, has received the Leadership in Energy and Environmental Design (LEED) Accreditation from the Green Building Certification Institute.

"I believe that 'green' is here to stay and I, along with other professionals at Whitman, am committed to incorporating sustainability, green design and other LEED principles into our projects," Sadowski said. "Achieving this distinguished accreditation is one way that I can show my dedication to the sustainability practice, other professionals and clients."

Since the program was launched in 2001, more than 75,000 people have received the accredited professional designation, identifying them as having extensive knowledge of the building practices and principles of the LEED rating system, which is developed and reviewed by the U.S. Green Building Council.

"Steve is the third member of our team to be accredited with this professional designation," Whitman President Barry Skoultchi said. "This, coupled with our continuous efforts to be at the forefront of innovative and creative professional services, allows us to continue to provide our clients with the quality services they demand."

Sadowski joined Whitman in August, 2008 as a project engineer in the mechanical engineering department. A graduate of New Jersey Institute of Technology, where he earned his Bachelor of Science in mechanical engineering and passed his EIT exams, he recently has been involved with several "green" projects including the design of an energy efficient heating, ventilating, and air conditioning system utilizing condensing boilers, energy recovery, and ice storage for a local high school.

#### ***About Whitman***

Whitman is New Jersey's leading full-service engineering firm offering MEP, environmental, civil, structural and geotechnical engineering services. Since its founding in 1985, the East Brunswick, N.J.-based company has performed more than 2,500 site assessments, remedial investigations and remediation designs for all types of development and redevelopment projects, including commercial, retail and residential properties in more than 12 states. Whitman is one of the largest full-service firms in the state, providing expertise in all areas of environmental and engineering services. Whitman purchased Brownworth Engineering, LLC (a 40 year old MEP firm) in 2007. Whitman has extensive experience in public and private sector projects including K-12 schools, higher education institutions, office buildings, data centers, warehouses, tenant fit-outs, medical facilities, hospitals and retail. Whitman provides a full range of MEP, life safety/fire protection, information technology and security including energy audits and building management, sustainable LEED design, high efficiency boilers, electrical distribution, lighting and structured cable.
