RESPONSIBILITY AND EXPERIENCE, WHITMAN

Mr. Ruetsch joined Whitman in October 2006. His responsibilities include senior project management in the civil engineering and geotechnical components of the company service line, developing new client base, and maintaining current and future clients.

Some of his recent professional assignments include:

- Project management of wireless project site development for several telecommunication service providers.*
- Management of a staff of engineers and drafting support for various telecommunication projects including development of drawings and construction observation services.*

SUMMARY OF OTHER PROFESSIONAL EXPERIENCE

French and Parrello Associates 2001-2006
Wall, NJ

Project Manager

Responsible for engineering design of telecommunication facilities consisting of design visits to locate the proposed site, preparation of leasing documents, development of zoning level drawings and support documents, and preparation of construction drawings to facilitate the bidding and building of the proposed facility. Managed several wireless service providers for the firm and oversaw a staff of 15 engineers and drafters. Handled multiple projects at various stages of development and provided all project management duties including proposal preparation, invoicing, and sub contracting management.

Berliner Communications 2000-2001
Elmwood Park, NJ

Senior Project Manager

Responsible for coordination of sub contracting architectural and engineering services for the development of a \$14 million wireless build-out program in Monmouth, Middlesex and Sussex counties in New Jersey. Managed a staff of 5 construction project managers, assigned and tracked all engineering related work for the project.
