RESPONSIBILITY AND EXPERIENCE, WHITMAN

Mr. Skoultchi joined Whitman in November 1986. As President, Mr. Skoultchi is responsible for management of the company and developing and managing projects pertaining to Brownfields redevelopment and industrial site restoration. He works closely with clients in identifying and implementing cost recovery/contribution opportunities for major redevelopment and remediation projects. Mr. Skoultchi works with attorneys as an expert on matters of cost allocation, liability, insurance, and remediation and has prepared expert reports for litigation on these issues.

Mr. Skoultchi's recent professional assignments include:

- Prepared an expert report for litigation involving the allocation of responsibility among predecessors for site contamination and developed a model for assessing allocation of remedial costs for the predecessors.
- Obtained grants from the HDSRF for private parties and various municipalities.
- Certified as an environmental expert by the United States Bankruptcy Court to provide expert testimony on the estimate cost to remediate a contaminated property.

BARRY I. SKOULTCHI, P.E.

PRESIDENT

- Directed the firm's involvement in several high profile Brownfield redevelopment projects including:
 - Redevelopment of former textile mill along Raritan River into 200+ luxury apartment complex.
 - Redevelopment of sites for use as school facilities in Elizabeth, Plainfield and Jersey City, New Jersey.
- Completed air emission audits at various industrial facilities.

SUMMARY OF OTHER PROFESSIONAL EXPERIENCE

**Raritan Enviro Sciences
East Brunswick, New Jersey**

1985-1986

Project Engineer

Responsibilities included the design and implementation of sampling and cleanup programs at industrial facilities. Mr. Skoultchi was also responsible for the development of air, water, and soil sampling protocols.

**New Jersey Department of Environmental Protection
Bureau of Air Pollution Control
Trenton, New Jersey**

1984-1985

Assistant Environmental Engineer

Directed a team of two engineers. Responsibilities included performing source emission sampling at industrial facilities and observing private consultants perform testing. Additional responsibilities included the review of Air Pollution Permit Applications for storage tanks, various manufacturing operations and control equipment, and the review of consultants' air pollution testing reports.
