RESPONSIBILITY AND EXPERIENCE, WHITMAN

Mr. Colagrande joined Whitman in January 2006. His responsibilities include developing the civil, geotechnical and structural engineering components of the current service line; mentoring staff engineers and scientists in their performance of project work; coordination with clients and regulatory agencies; and developing new business opportunities to maintain and maximize current and future clients.

Some of his recent professional assignments include:

- Managing a staff of 11 in the development of design documents for various engineering projects including telecommunications facilities, medical facilities and solar energy installations.
- Providing expert witness testimony in support of local Zoning Board and Planning Board applications.

SUMMARY OF OTHER PROFESSIONAL EXPERIENCE

French and Parrello Associates, PA
Wall, New Jersey

2001-2005

Department Manager

Responsible for a staff of 20 engineers and drafters in two offices. Prepared and administered departmental budgets, payroll, staff reviews and staff hiring. Reviewed all engineering designs and

SENIOR VICE PRESIDENT

drawings prepared by staff prior to submittal to clients. Signed and sealed a majority of the civil designs and coordinated work with other Professional Engineers. Attended and testified before municipal planning and zoning boards in support of designs and played an active part in client relations and marketing.

French and Parrello Associates, PA
Wall, New Jersey

1996-2001

Project Manager

Responsible for managing client accounts as well as providing the Civil and Geotechnical engineering support required for the projects. This included site design, site plan preparation, soil borings, foundation design and construction inspections. Managed a staff of 3-5 employees and coordinated with other disciplines of engineering to develop the final design.

Melick-Tully Associates
South Bound Brook, New Jersey

1993-1996

Geotechnical Engineer

Responsible for performing soil boring inspections, laboratory testing, field inspections, and monitored large earthwork operations.

French and Parrello Associates, PA
Wall, New Jersey

1990-1993

Staff Engineer

Responsible for a variety of tasks including construction inspections, field testing, basic structural designs, work on a survey crew and soil boring inspection.
