

Brownfield Redevelopment Services Pennsylvania Act 2

Overview

In 1995, the Land Recycling and Environmental Remediation Standards Act (Act 2) codified requirements for the investigation and remediation of contaminated properties in Pennsylvania.

Act 2 provides a framework for identifying remediation standards and procedures for applying the standards to encourage the voluntary cleanup and reuse of contaminated commercial and industrial sites.

Whitman's team of environmental specialists, engineers, scientists and geologists can guide clients through the Act 2 regulations to achieve environmental closure and liability protection for remediation of their industrial, commercial, residential or retail sites in Pennsylvania.

Our Services

Some of the services Whitman offers to property owners, developers and contractors for cleanups conducted under Act 2 include:

- Due Diligence
- Property Assessments
- Soil / Groundwater Investigations
- Risk Assessments
- Attainment Monitoring
- Post-Remediation Care Plan
- Regulatory Liaison
- Remedial Investigations
