

## Ecological Evaluation & Restoration Services

### Overview

In today's ever-changing environmental market, it is important to embrace 21<sup>st</sup> century clean-up goals. The New York, New Jersey and Pennsylvania Departments of Environmental Protection goals extend into ecological end-use that will benefit future generations. These goals are demanding environmental remediation directives that enhance renewability, conservation and sustainability.

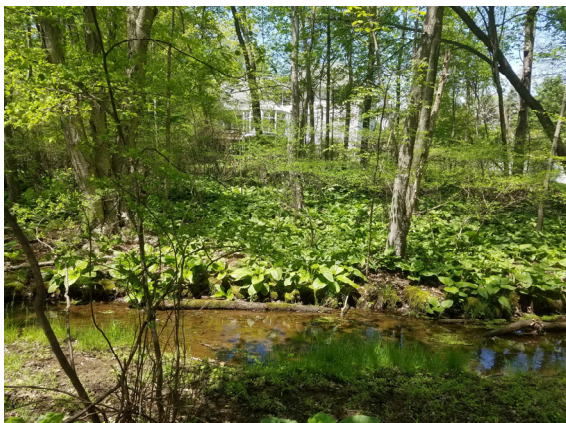

Whitman's team of environmental scientists, engineers and ecologists can guide clients through navigating the more stringent environmental regulations for site remediation and restoration in environmentally sensitive natural receptors.

### Our Services

Some of the ecological evaluation and restoration services Whitman can offer property owners, developers and contractors include:
