

Electrical Engineering Services

Does Your Site Require Electrical Engineering Services?

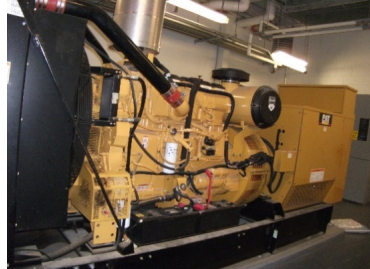

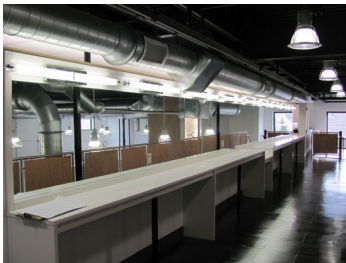

Whitman specializes in designing and implementing engineering solutions tailored to client priorities. Our team has decades of experience in the design of electrical systems, specializing in solutions to maximize building performance and energy efficiency.

Our Services

For over 30 years, Whitman has been providing the following electrical engineering services to site/civil engineering consulting firms:

- Standby/Emergency Generator Design
- Pump Station Power Circuiting
- Comfort Station Design
- Field Lighting Design
- Exterior Site Lighting Design
- SCADA Systems Documentation
