## Sustainability Services

### Overview

Sustainability is more than just recycling; it has evolved into a focused pursuit of global environmental sustainability.

Whitman's team of environmental and engineering professionals can review your operations and provide a comprehensive report on items from as basic as pen recycling to as complex as geothermal heating and cooling.

We take a hands-on approach by spending time with your staff to get a better understanding of the current operations and then we look for logical solutions to help reduce your carbon footprint.

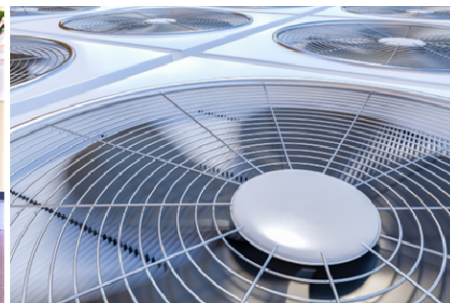

Whitman will even assist with developing a "Switch-Off Campaign" and creating a multi discipline "Green Team" to help push initiatives forward.

### Our Services

Some of the topics we assess include:

- Equipment Efficiency
- Paper Usage
- Retro Commissioning
- Green House Gases
- HVAC/Refrigerants/Boiler Efficiencies
- Waste Management & Recycling
- Green Chemical/Ingredient Alternatives
- Sustainable Design
- Geo-Thermal Heating/Cooling
- Indoor Air Quality
- Water/Steam Usage
- Facility "Wellness"
- Lighting & Electricity
- Renewable Energy
