

Power System Analysis

Whitman specializes in designing and implementing engineering solutions tailored to client priorities.

Our team has decades of experience in the design of electrical systems, specializing in solutions to maximize building performance and energy efficiency.

Our Services

For over 20 years, Whitman has been providing electrical engineering services as part of our engineering design offerings.

Whitman has experience in **Power System Analysis** and studies to assist with electrical system design for all building types. Whitman can assist with Power System Analysis services such as:

- **Arc Flash Hazard Analysis**
- **Short Circuit Analysis**
- **Protective Device Coordination Studies**
- **Relay Settings**
